### **CLIENT AGREEMENT AND DISCLOSURE STATEMENT**

#### **For Integrative Energy-Medicine Sessions**

**Welcome!** Thank you for your interest in working with me as a client either in person or remotely over the phone or internet, whichever is applicable. I am providing you with the following information so that you can make an informed choice about your decision to engage my services. I specialize in guiding my clients to release stress, to heal their wounds of physical and/or emotional trauma, gain greater clarity, achieve optimal health, and experience expanded awareness, inner peace, and a renewed sense of joy and balance in their lives. I offer private sessions focused on tailored solutions addressing each client's specific needs for healing and personal transformation. Please read this information carefully and let me know, if there is any part that you do not understand. Although I am committed to sharing my skills and abilities to support your well-being, my work with you is only a resource. As an intentional and conscious participant in your growth, you will ultimately take all responsibility for and actions related to your mind-body-spirit health and well-being.

#### **PROFESSIONAL SERVICES OFFERED**

My consulting practice is built around a holistic wellness paradigm that characterizes total wellness as the integration, balance, and harmony of mental, physical, spiritual, and emotional aspects of the human condition. Energy medicine serves as my framework for the relaxation techniques I offer to clients as stress-management tools and for addressing a wide range of health and wellness concerns. My primary energy-medicine modalities are NES Health, Eden Energy Medicine, and the Emotion Code. In addition, I draw on my training and expertise in Reiki, Reconnective Healing®, Shamanism, Hatha/Trauma-Sensitive Yoga, and the Melt Method®, as appropriate. You have the option of selecting individually or collectively any of the services I offer as part of our work together.

#### **TERMINOLOGY AND BACKGROUND INFORMATION**

The term *energy* is generally associated with two kinds of energy fields—veritable energy fields, which can be measured, and putative (or subtle) energy fields, which (for the most part) cannot be measured with current technology. The human body creates and is affected by both types of energy fields. *Energy Medicine* is a collective term that is used to refer to a variety of approaches and techniques involving subtle energy fields as well as a measurable regulating field of energy and information—the human body-field. The subtle fields are believed to connect into the physical body through various subtle energy systems, such as the acupuncture meridians and the chakras. Extensive research has shown that the body-field operates in the physical body at the sub-cellular level and serves as the master control system for all physiological functions.

The prevailing premise of energy medicine is that unrestricted flow and balance of the body's subtle energies and an undistorted body-field are vital for mental, physical, spiritual, and emotional health and for fostering high-level well-being. Energy medicine focuses on identifying blockages and distortions in the body's energy and information fields and on engaging specific processes and techniques to resolve them, with the goal of boosting health and vitality. Some of these approaches, such as the NES Health system and Eden Energy Medicine, are directive in nature and rely on a trained practitioner to identify and address specific issues in the body-field or specific subtle energy systems; other approaches, such as Reiki and Reconnective Healing®, are non-directive and focus on facilitating a process that is believed to be guided by a higher intelligence. Energy medicine is both a complement to more traditional medical care and, in itself, a comprehensive system for holistic healthcare.

When using energy-medicine techniques, I am not *diagnosing* or *treating* the physical body, which is the domain of medical and allied healthcare professionals; instead, I am working with energy and information flows and structures in the

body-field and with the body's subtle energies. There is a distinction between *healing* using energy medicine and the practice of medicine or any other licensed healthcare profession whose mission it is to *cure*. The purpose of *healing* is to assure a state of wholeness, whereas *curing* means to erase symptoms of illness or disease in the physical body.

## **NES Health**

After decades of research, the late frontier scientist Peter Fraser formulated a system that unites the meridian system of traditional Chinese medicine with quantum wave theory to provide the first comprehensive link between the body's biochemistry and bioenergetics. He found that we each have a body-field with twelve meridian-like channels that process and coordinate information throughout the body and that our health and well-being depend on the proper flow and communication of information through these channels.

The NES Health Total WellNES System is aimed at enhancing the body's innate self-healing abilities by correcting blockages and distortions in the energy and information flows of the body-field—the master control system for the body's physiological functions. The Total WellNES System has three components performing specific synergistic functions: ProVision (assess/re-assess), miHealth (rejuvenate), and Infoceuticals (re-imprint).

**NES ProVision** is a comprehensive health-assessment tool that scans the human body-field to identify the bioenergetic and bioinformational distortions that may underlie physical and emotional issues.

The **NES miHealth** is a handheld pulsed electro-magnetic field (PEMF) device; it helps to release energy blockages, stimulate trigger points, and bring the body's oscillations back to normal. It also prepares the body-field for subsequent infoceutical protocols.

**NES Infoceuticals** are liquid energetic remedies that have been imprinted with bio-information to directly correct distortions in the body-field and restore the body's inherent self-healing abilities.

The Home WellNES version of the NES Health System allows you to scan your body-field from the comfort of your home as part of a remote session where you will review the scan results and obtain recommendations for miHealth (if applicable) and infoceutical protocols.

## **Eden Energy Medicine**

As a certified Advanced Practitioner (AP) of Eden Energy Medicine (EEM), many of the techniques and principles of energy medicine that I apply in my practice come from the work of Donna Eden; her approach uses the human hands as the tools for manipulating and harmonizing the body's subtle energy systems and fields. I specialize in repairing the subtle body's *skeleton*, the *Basic Grid*. This advanced EEM protocol is aimed at healing the wounds created deep within the subtle body by physical and/or emotional trauma.

The various EEM techniques I use and teach involve touching, holding, tracing, tapping, and moving over specific areas of the body while you are standing, sitting, or lying down. I also engage elements of applied kinesiology, commonly referred to as *muscle-testing*, that involve a light-pressure/counter-pressure technique with specific muscles. This technique is a way of assessing the energy flow through certain areas of your body and often helps to identify the specific approach that will be most beneficial for your needs. Throughout the session, I will explain to you what I am doing and why; I will ask your permission before touching your body; and I will encourage you to ask me questions and provide feedback on how you are feeling and what you are experiencing.

## **The Emotion Code**

Every emotion carries a certain vibration that interacts with the body's energy fields. Traumatic life events create negative emotions that distort these fields and, if not completely processed, can get stuck somewhere in the body. Over time, these *trapped emotions* tend to accumulate and often become the underlying causes of physical discomfort and mental/emotional problems.

Recurring feelings involving a deep sense of hurt, grief, or loss may lead to the formation of a so-called *Heart-Wall*, an energy wall consisting of trapped emotions created around the heart to protect it from further emotional damage.

The Emotion Code, created by Dr. Bradley Nelson, DC, is an energy-medicine technique that engages the subconscious mind to identify and release trapped emotions, making conditions right for the body to heal. Through this process, physical issues and emotional difficulties usually become much more manageable and often completely disappear.

## **OUTCOME EXPECTATIONS, RISKS, AND BENEFITS**

Energy medicine provides a comprehensive framework for assessing, correcting, and stabilizing the subtle energy flows of the body and the integrity of the body-field through the work we do together in the office and the recommended protocols you follow at home. However, it is impossible to guarantee any specific results. We do not know how you will personally respond to the services I offer, but we will work together to achieve the best possible results for you. While the methods I use and teach are gentle and considered safe and non-invasive, it is possible to experience some physical discomfort or emotional distress after your energies have been stimulated and manipulated. This situation may occur in our sessions together or when you are working on your own in between sessions.

Occasionally, some people have experienced dizziness, nausea, or anxiety as side-effects from energy work. If any technique is uncomfortable or does lead to discomfort or distress, please tell me at once. I will stop immediately and can often apply another technique to rebalance the energies whose stimulation is causing discomfort or distress. At the end of the session, if applicable, I will suggest self-care exercises aimed at stabilizing and enhancing the work we have done. If indicated, I can also help refer you to an appropriate professional healthcare provider for further assistance. It is your responsibility to notify me of questions or concerns you have about the energy-medicine services you are receiving and your response to them, as well as to schedule any follow-up sessions you desire.

## **MY BACKGROUND AND TRAINING**

Originally trained as a research scientist with a PhD in mathematics and graduate-level education in physics, I dedicated 26 years to an accomplished career supporting Department-of-Defense operations worldwide. All along, I have had a passion for natural medicine and holistic approaches to healthcare; my formal training in working with subtle energies began in 2007. I am certified as a NES Health Practitioner, Advanced Practitioner (Four-Year Graduate) of Eden Energy Medicine (EEM-AP), Emotion Code Practitioner, facilitator for Reconnective Healing® and the Reconnection®, Whole Health Medicine Institute Practitioner, Holistic Stress Management Instructor, Hatha Yoga Teacher (RYT 200®), Trauma-Sensitive Yoga Teacher, MELT® Hand-and-Foot Instructor, Reiki Master/Teacher, Shamanic Practitioner, and in specific applications of essential oils. Moreover, I hold a current CPR/AED certificate from the American Red Cross and a certificate in Mental Health First Aid.

## **LIMITATIONS OF MY ENERGY MEDICINE PRACTICE**

While energy medicine appears to have promising mental, physical, spiritual, and emotional benefits, it has yet to be fully researched by the Western academic, medical, and psychological communities and, therefore, is considered experimental at this time. The field of energy medicine is, for the most part, self-regulated, and it is considered *complementary* or *alternative* to the traditional healthcare professions that are licensed in the United States and in the State of Colorado.

As a Complementary and Alternative Healthcare Practitioner, I am not licensed, certified, or registered by the State of Colorado as a Healthcare Professional. While I have extensive training and experience in the healing arts, I am not a physician, psychologist, psychotherapist, or other licensed healthcare provider, nor are my services licensed by the State of Colorado. I am covered by Professional and General Liability Insurance applicable to any injury caused by an act or omission in providing the complementary and alternative healthcare services I offer.

Energy medicine is not a substitute for the diagnosis and/or treatment of medical or mental-health conditions by a licensed healthcare professional. If you have a disorder that has been previously diagnosed, treated, or managed by a licensed medical or mental-health professional, my services should be used only in conjunction with your obtaining that care. In addition, any information shared during our sessions is **not** to be considered a recommendation that you stop seeing any of your healthcare professionals or using prescribed medication, if any, without consulting with your healthcare professional, even if after a session it appears and indicates that such medication or treatment is unnecessary. You should discuss any recommendations made by me with your primary-care physician, obstetrician, gynecologist, oncologist, cardiologist, pediatrician, or other board-certified physician, as applicable. Regardless of our work together, you agree to take full responsibility for your self-care in the mental, physical, spiritual, and emotional dimensions of your life.

Please let me know, if you fall into any of these categories prior to starting our work together. We can discuss any emotional risks associated with touch that may be of concern to you.
