

See into Your Future and Revolutionize Your Health

How a Flash of Insight Led to the Future of Wellness Now in the Comfort of Your Home

This is pure information, and the true story of a flash of insight – with a twist!

What you're about to read has changed many lives – and may be the catalyst for changing yours.

If you or a loved one has tried conventional or alternative medicine for chronic conditions, pain, anxiety, insomnia, headaches, indigestion or exhaustion... and didn't experience long term relief or a cure...you are not alone.

Harry Massey's story may be your story, and his solution just might revolutionize your health.

How can we help someone who is too sick to get out of bed?

Harry Massey was ill, and getting sicker by the month. Diagnosed with Chronic Fatigue Syndrome his health deteriorated steadily until he became bedridden for seven long years.

The symptoms were devastating. Crushing fatigue would hit like a storm, leaving a black cloud over Harry's head and driving him to bed. He felt that

all he could do was hope for the best, yet prepare for the worst.

Yet he never gave up. He visited practitioner after practitioner, searching for answers in both conventional and alternative medicine – to the point where his parents were fed up driving him to one clinic after another.

Fortunately along the way Massey met Peter Fraser, a visionary scientific thinker, who had invested more than 20 years researching what he called the “human body-field” and developed remedies based on his discoveries.

Amazingly, these remedies helped Harry get better step by step until he made a complete recovery.

During his healing journey Harry spent a great deal of time lying in bed and staring at the ceiling.

Suddenly one day, Harry had a flash of insight:

“What if there was a way for people to find out what was wrong with them and get well from the comfort of their own home?”

“Why should people who are so ill they can't get out of bed have to drag themselves from clinic to clinic in hopes of finding the right help?”

WellNES at Home, Anytime, Anywhere

This was the birth of a revolutionary idea: a home wellNES system that anyone can use easily,

whether you are resting in bed on travelling the world.

Harry set out to provide “information” to help people, little realizing that he would soon be “imprinting information” in little bottles!

Together Harry and Peter founded NES Health, a simple, powerful system to use remotely to spiral people up to total wellness.

His mission: to create the healthcare of the future, that anyone can access anytime, anywhere.

The Life-Giving Force of Information

Did you ever think about how your body-field instinctively knows what to do? A perfect example of this is the marvel of life itself.

We all start from a single cell that divides over and over again, forming tissues and organs, ultimately creating a functioning human being.

How miraculous is that, and how exactly does nature know what to do?

The answer is “information.” Information describes the way our systems are organized, but information also directs the development of that system to create “life”.

How to SEE the Unseen

Throughout history, mystics and healers have claimed we are “energy beings” surrounded by a complex, structured network of fields that interpenetrate the human physical body.

While traditional healthcare has primarily focused on physiology, our research shows that energy and information control biology. In fact, frontier science proves that our bodies regulate energy and information at a subcellular level.

At NES Health we call this the Human Body-Field (HBF), and it serves as the master control system for

all your physiological functions.

With over 30 years of research we have discovered that the two causes of physical problems are distortions and blockages in the body-field.

NES products help activate your body’s own healing systems by correcting distortions. This helps restore your body to optimal wellness.

SEE your Future Wellness

It took 12 long years of research, building the technology and having the Internet advanced enough to handle the data from your body-field, to be able to bring this unique, remote WellNES program to your home.
