THE PHOTONWAVE SYSTEM

Healing with Colored Light

The PhotonWave system is built around an electronically-controlled light-emitting wellness device that has been developed, tested, and perfected by scientists, medical experts, and holistic-health practitioners over the past 30+ years.

The device is configured to project colored light into the human eyes. This safe, non-invasive method engages different parts of the brain that play key roles in detoxification and regulation processes and gently stimulates and supports the body's innate self-healing mechanisms.

Customized protocols, employing combinations of colors, pulse rates, and exposure times, are used to address energetic imbalances associated with a wide range of physical, mental, emotional, and behavioral issues. The number of PhotonWave sessions needed to achieve certain results will vary by individual and will typically be greater for chronic versus acute conditions.

PhotonWave sessions can be conducted both **on-site and remotely**. Please contact us for specifics. For additional information, please visit **PhotonWave.be**.
